EXPERIENCE/PROJECTS

Attendance Management System (C#.NET, Microsoft SQL Server)

FullStack Developer

December 2024 - January 2025

Developed a comprehensive attendance management system to streamline tracking and reporting, demonstrating full-stack development capabilities.

- Front-End Development:** Designed and implemented a user-friendly interface using C#.NET, enabling efficient data input, display, and manipulation for attendance records.
- Back-End Development & Database Management:** Engineered the system's logic and data storage using C#.NET and Microsoft SQL Server, ensuring data integrity, optimized query performance, and robust data management.
- Full-Stack Implementation:** Integrated front-end and back-end components, demonstrating proficiency in both client-side and server-side development, resulting in a functional and scalable application.

ATM Management System (Python, Tkinter, SQLite3)

October 2024 - November 2024

Developed a functional ATM management system, showcasing proficiency in GUI development and database integration using Python.

- Graphical User Interface (GUI) Development:** Designed and implemented an intuitive user interface using Tkinter, enabling seamless interaction for ATM transactions, including balance inquiries, withdrawals, and deposits.
- Database Management (SQLite3):** Engineered the system's data storage and retrieval using SQLite3, ensuring secure and efficient management of user account information and transaction history.
- Full Application Development:** Integrated the GUI with the database backend using Python, demonstrating end-to-end development skills and the ability to create a complete, functional application.
